

CLAIM AMENDMENTS

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims

1-11 (cancelled)

12. (currently amended) A medicinal composition according to claim 2, comprising:

at least one pharmaceutical;

at least one nutraceutical; and

a pharmaceutically acceptable base;

wherein at least one of the pharmaceutical and the nutraceutical treats an immune response of the respiratory system, said immune response of the respiratory system causing a coughing reflex; and

wherein the pharmaceutical comprises an effective amount of a cough suppressant agent; and

the nutraceutical comprises an effective amount of an immune boosting agent.

13. (original) A composition according to claim 12, wherein the cough suppressant agent comprises dextromethorphan.

14. (original) A composition according to claim 12, wherein the immune booster comprises at least one nutraceutical selected from a group consisting of the group zinc and effective salts thereof, at least one herb selected from a group consisting of herbs of the genus *Echinacea*, at least one herb selected from a group consisting of herbs of the genus *Sambucus*, Goldenseal, and mixtures thereof.

15. (original) A composition according to claim 12, further comprising at least one additive selected from the group consisting of:

- a) an antioxidant;
- b) an expectorant;
- c) a decongestant;
- d) a liver protectant; and
- e) a cough reflex sedating agent.

16. (original) A composition according to claim 12, further comprising an antioxidant selected from a group consisting of at least one bioflavonoid, at least one herbal extract containing at least one bioflavonoid, ascorbic acid and pharmaceutically effective salts and derivatives thereof, garlic and extracts thereof, green tea and its extracts, at least one herb selected from a group consisting of herbs of the genus *Astragalus*, and combinations thereof.

17. (original) A composition according to claim 12, further comprising an expectorant comprising guaifenesin.

18. (original) A composition according to claim 12, further comprising a decongestant selected from a group consisting of phenylpropanolamine, pseudoephedrine, ephedrine, phenylephrine, naphazoline, oxymetazoline, tetrahydrozoline, xylometazoline, propylhexedrine, L-desoxyephedrine, effective salts thereof and combinations thereof.

19. (original) A composition according to claim 12, further comprising a liver protectant comprising milk thistle.
20. (original) A composition according to claim 12, further comprising a cough reflex sedating agent comprising wild cherry bark, extracts thereof and combinations thereof.
21. (original) A composition according to claim 12, wherein the cough suppressant comprises dextromethorphan and the immune booster comprises zinc and effective salts thereof.
22. (original) A composition according to claim 12, wherein the cough suppressant comprises dextromethorphan and the immune booster comprises at least one herb selected from a group consisting of herbs of the genus *Echinacea*.
23. (original) A composition according to claim 12, wherein the cough suppressant comprises dextromethorphan and the immune booster comprises at least one herb selected from a group consisting of herbs of the genus *Sambucus*.
24. (original) A composition according to claim 12, wherein the cough suppressant comprises dextromethorphan and the immune booster comprises Goldenseal.

25-76 (cancelled)

77. (currently amended) A method according to claim 67, of treating a cough, comprising:
at least one pharmaceutical;
at least one nutraceutical; and
a pharmaceutically acceptable base;
wherein at least one of the pharmaceutical and the nutraceutical treats an
immune response of the respiratory system, said immune response of the
respiratory system causing a coughing reflex; and
 wherein the pharmaceutical comprises an effective amount of a cough
 suppressant agent; and
 the nutraceutical comprises an effective amount of an immune booster.

78. (original) A method according to claim 77, wherein the cough suppressant agent
comprises dextromethorphan.

79. (original) A method according to claim 77, wherein the immune booster
comprises at least one nutraceutical selected from a group consisting of the group zinc
and effective salts thereof, at least one herb selected from a group consisting of herbs of
the genus *Echinacea*, at least one herb selected from a group consisting of herbs of the
genus *Sambucus*, Goldenseal, and mixtures thereof.

80. (original) A method according to claim 77, further comprising at least one
additive selected from the group consisting of:

- a) an antioxidant;
- b) an expectorant;
- c) a decongestant;
- d) a liver protectant; and
- e) a cough reflex sedating agent.

81. (original) A method according to claim 77, further comprising an antioxidant selected from a group consisting of at least one bioflavonoid, at least one herbal extract containing at least one bioflavonoid, ascorbic acid and pharmaceutically effective salts and derivatives thereof, garlic and extracts thereof, green tea and its extracts, at least one herb selected from the group consisting of herbs of the genus *Astragalus*, and combinations thereof.
82. (original) A method according to claim 77, further comprising an expectorant comprising guaifenesin.
83. (original) A method according to claim 77, further comprising a decongestant selected from a group consisting of phenylpropanolamine, pseudoephedrine, ephedrine, phenylephrine, naphazoline, oxymetazoline, tetrahydrozoline, xylometazoline, propylhexedrine, L-desoxyephedrine, effective salts thereof and combinations thereof.
84. (original) A method according to claim 77, further comprising a liver protectant comprising milk thistle.
85. (original) A method according to claim 77, further comprising a cough reflex sedating agent comprising wild cherry bark, extracts thereof and combinations thereof.
86. (original) A method according to claim 77, wherein the cough suppressant comprises dextromethorphan and the immune booster comprises zinc and effective salts thereof.
87. (original) A method according to claim 77, wherein the cough suppressant comprises dextromethorphan and the immune booster comprises at least one herb selected from a group consisting of herbs of the genus *Echinacea*.

88. (original) A method according to claim 77, wherein the cough suppressant comprises dextromethorphan and the immune booster comprises at least one herb selected from a group consisting of herbs of the genus *Sambucus*.

89. (original) A method according to claim 77, wherein the cough suppressant comprises dextromethorphan and the immune booster comprises Goldenseal.

90-130 (Cancelled)
